

aeris[®] muvmat

Enhanced standing with the intelligent **active standing mat** that simulates walking on an undulating mossy forest floor.

„FEELS LIKE STANDING
ON THE FOREST FLOOR“

aeris® muvmat: Standing better actively and naturally.

Standing on a hard floor is strenuous work. Conventional, flat foam mats bring little relief. With the **aeris muvmat** you stand naturally, remain active and relaxed and are always on the move – like on a forest floor.

The soft, resilient and proactive standing mat brings stress relief for the whole body, protects joints and helps prevent tired legs. The standing mat feels good with shoes on and is also perfect for barefoot enthusiasts. Besides excelling in office workplaces the **aeris muvmat** can also be used in production, in the lab, for therapy or at home.

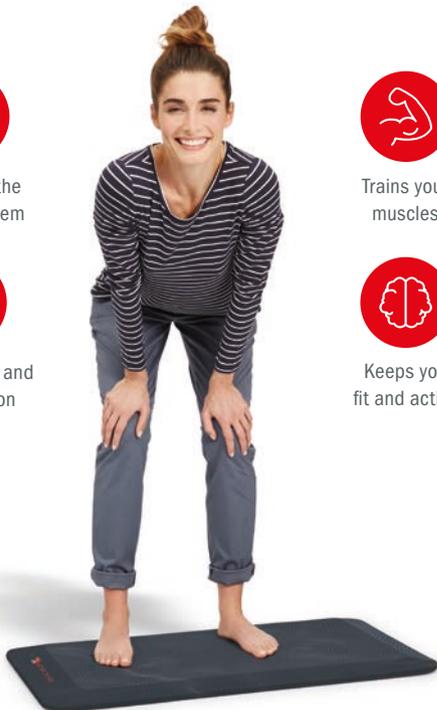

Ideal for all standing workplaces!

Stimulates the sensory system

Relieves foot and back tension

Trains your muscles

Keeps you fit and active

Two zones: To your advantage.

The **comfort zone** is made of a cushioning and fatigue-reducing foam material that has a large standing surface. Optionally available with protection cover.

The **active zone** features a 3D structure – rather like that of mountains and valleys. This ensures random activation of reflex zones and stimulates the sensory system. It also encourages movement and keeps you mentally and physically fit.

A very down to earth approach: Technical data.

Size:	91.5cm x 48cm x 3.5cm 36" x 18.9" x 1.4"
Weight:	2.7kg 6lbs
Mat material:	EPP and flexible PU integral foam
Cover material (optional):	100 % Polyester

Together we can get things **moving!**
