

Stand or sit?
Both.
And very well.

muv•man®
Active-Sit-Stand

Productivity is a matter of **stance.**

Did you know that one employee in two often or always has to stand when working. It is a dilemma that this occurs in all professions and that millions are suffering from the related strain and pain.

The health consequences range from tension, stiff muscles, bad blood circulation, metabolic disorders and damage to the spine and joints through to chronic bad posture. The consequences for companies and the economy are expensive loss of performance and working days.

That is why we developed the **muvmán**. The innovative active seat for standing/sitting brings motion to the workplace. It is unique in that it combines dynamic movement when standing and sitting and gives many impulses for intuitive posture change.

Thus the **muvmán** not only works uncompromisingly against the drawbacks of a standing workplace, but also goes one step beyond: it boosts workplace productivity.

Productivity that comes from an optimised workplace configuration, physical fitness and inner motivation.

One fit **for all.**

The **muvman** was designed for use in all areas of work. Ideal sitting at a standard desk height is just as much an option as optimum standing/sitting at high working surfaces. The enormous height adjustment range of the **muvman** is unique. It provides the right sitting and standing conditions for people of all heights and physiques. This is a special advantage, because all sorts of people can use one and the same **muvman**.

Seat surface:	34cm x 32cm 13.4" x 12.6"
Seat height:	51cm to 84cm 20" x 33.1"
Tilt:	4° permanent tilt
Weight:	6.3kg 13.9lbs
Maximum load:	120kg 265lbs
Base material:	Glass-fibre reinforced polyamide, coated
Seat cover:	Premium microfibre
Height adjustment:	Continuous, buttons left and right under seat
Baseplate:	All-round non-slip, non-scratch rubber
Special models:	HIGH version with seat height of 60cm to 93cm 23.6" x 36.6"

*The **muvman** FACTORY is only available in black.

Moving. In every detail.

No room for compromises.

Get a grip on it: **muvman** FACTORY.

Perfectly at home on production lines, in assembly shops and other workplaces.

The challenges for equipping ergonomic workplaces are great. High productivity and robustness have to be harmonised with healthy working conditions and employee motivation. The **muvman** FACTORY plays a major role here:

- Diverse application options at all working heights with an enormous height adjustment range
- Perfect standing stability and practical carrying handle
- Permanent tilt of the gas spring for optimum position to the working surface
- Multidimensional movement for greatest possible reach and active, non-fatiguing standing/sitting

Dustproof and dirtproof cover

Extremely robust textured
vinyl leather seat cover

Our **success** is in motion.

If you observe children, you will see that there is hardly a time when they are still. Movement is in the very nature of the human being. It is the long periods of sitting and standing – in school, at work and in the car – that puts the body into a straightjacket of motionlessness, which we pay for at a very high price: our health.

Therefore, since 1997, **aeris** has devoted itself to revolutionising standing and sitting at the workplace. Our philosophy is as simple as it is effective: more motion, in three dimensions. We call that 3D ergonomics. For our customers this means better health, more motivation and higher productivity. And success proves us right. Be it the **swopper**, **muvman**, **3Dee** or **oyo** – our products set new benchmarks and have catapulted **aeris** into the top 100 of the most innovative small and medium-sized German businesses.

Together we can get things **moving!**

Just get in touch with us.
