

# Care Instructions

## oyo

### Cover material

#### Net structure seat cover

- Vacuum clean carefully and regularly.
- Wipe off stains with a soft cloth and pH neutral soap.
- Only dampen the seat and never make it completely wet, otherwise the cushioning under the fabric might be damaged. Therefore use only very small amounts of water and detergent.

**Warning:** When cleaning the oyo, do not lay it on the edge of the seat shell as this might damage the seat cover.

### Cleaning of the frame

- Clean the frame only with a dry microfibre cloth.
- If necessary, wipe down using a lint-free cloth with lukewarm water and pH-neutral soap.
